

My-body-float

Floating Room

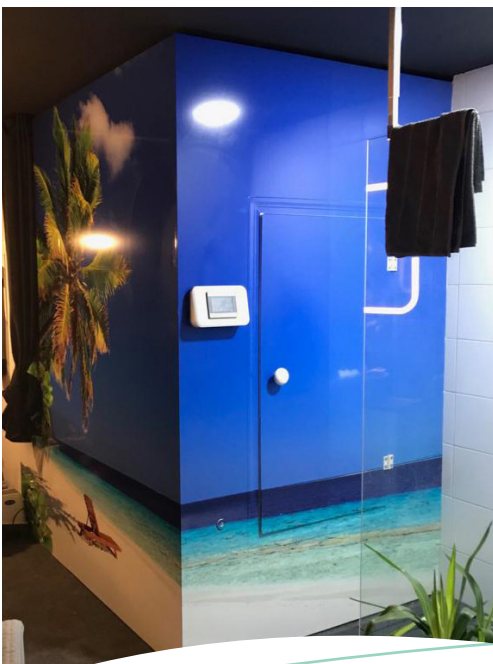

My-body-float Floating Room

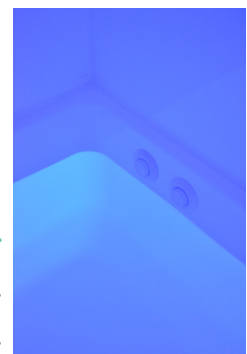

Floating is one of the most effective ways to achieve the state of physical and mental deep relaxation. In the special “My-body-float” Floating Room, the guest rests almost weightlessly on the surface of the water, carried by concentrated, approx. **36 °C warm salt water**. Secluded from any external stimuli, one floats away from everyday life and can accompany this meditative experience with light effects and music, depending on your personal feelings.

The ambient temperature in the Floating Room is also about 36 °C - the bather feels **almost no difference between the water and the air**. The body rests at an ideal temperature and does not have to expend energy to compensate for temperature fluctuations. In this weightless calm, the limits of one’s own body seem to dissolve.

Light and starry sky may be > switched on/off from inside.
Emergency call included.

Individuel exterior design:

- > Technology terminal can be installed in different places.
- > Door can be mounted in different positions.
- > Room height according to your needs.
- > Exterior walls can be designed individually.

Float away from everyday life...

The Trautwein “My-body-float” Floating-Room has a surface area of 2.5 m x 1.4 m and a height of approx. 2.3 m. Due to the generous dimensioning, a comfortable entry and exit is possible and the bathing guest enjoys the application without feeling cramped. Even floating for two is possible.

As each “My-body-float” Floating Room is planned individually, the customer’s wishes can be taken into account regarding the height of the room, the position of the door and the technical terminal as well as the exterior design. Heating and technology are installed directly at the cabin; a separate technical room is not required. Thus, the Floating Room fits perfectly into its environment.

Customized settings:

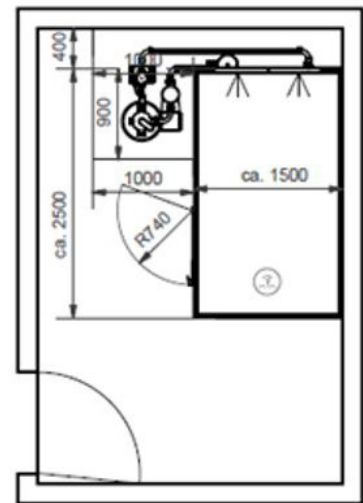

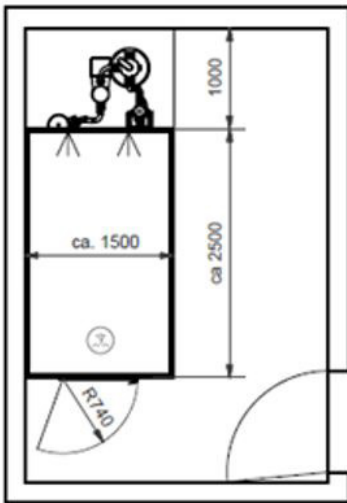

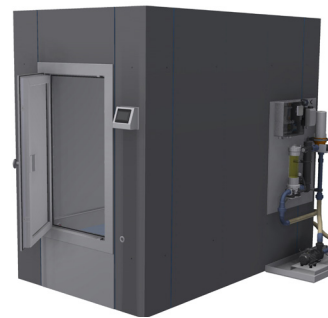

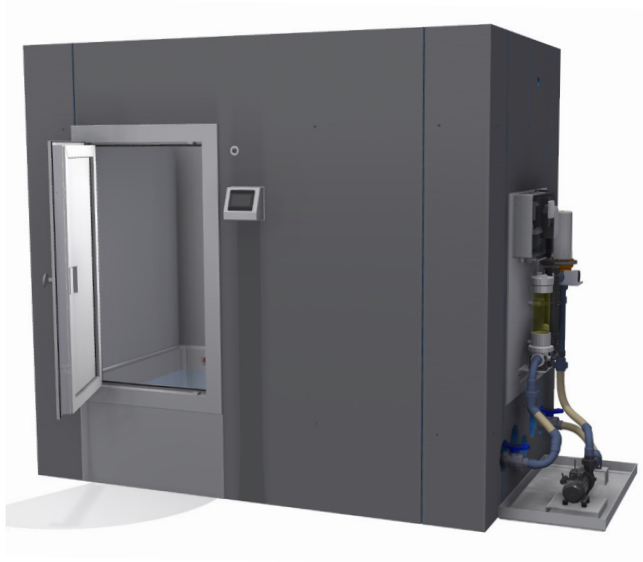

- › Programs can be set as desired.
- › LED underwater floodlights switch program-controlled.
- › Starry sky can be switched on/off.
- › Consistent internal temperature of water and air.

- › Interior with starry sky and blue LED headlights.

Made in Germany.

Since 1928, we have been perfecting our products in southern Germany. Pure relaxation and unique functionality are our highest goals. The close cooperation with therapists and physicians as well as our own experience and competence are the basis for our worldwide success. In the meantime you can find Trautwein products in more than 80 countries worldwide - everywhere where highest quality is crucial.
